

# Program for Imaging & Cognitive Sciences (PICS) at

Columbia University Medical Center  
is pleased to announce the appointment of

**MICHAEL FLOMENHAFT, ESQ.**

as

Director of Neurolaw.

This new position has been created within PICS in recognition of the emerging importance of the interface between advances in cognitive neuroscience and neuroimaging and the practice of law.

We believe this appointment is one of the first of its kind in the United States. It is intended to facilitate the establishment of both new theory and practice to inform litigation and legal process based on developments in cognitive neurosciences, functional neuroimaging, and other ongoing advances in neuroimaging applications.

Program for Imaging & Cognitive Sciences (PICS)
